discovery
GSE149648 (rat DRG)
Walker-256 tibia
sham, d1, d7, d14
n = 4/group
exact permutation
C(8,4)² = 4,900 pairs
22 modules + markers
Q1 aetiologies diverge
(myeloid/interferon
vs neuronal injury)
the layer
GSE160543 (rat DRG)
paclitaxel / oxaliplatin
vehicle
n = 4/group
in-silico perturbation
17 targets vs 5 controls
degree-matched nulls
Q2 no target ranking
anti-selective vs
negative controls
validation
GSE292522 (mouse DRG)
B16F10 vs keratinocyte
n = 4 + 4 animals
55,967 cells
per-animal pseudobulk
limma-trend
compartment bins
interferon programme
is model-specific
